

Á myndunum kemur fram samband á milli tillagna Hafrannsóknastofnunarinnar um heildarafla, ákvörðunar sjávarútvegsráðherra um úthlutað heildaraflamark og endanlegrar heildarveiði á árunum frá 1986, annars vegar varðandi þorskafla og hins vegar loðnuafla.

*These figures show the relationship between the total allowable catch (TAC) recommended by the Marine Research Institute, the decisions of the Minister of Fisheries on allocated TAC, and the actual total catch since 1986, firstly for cod and secondly for capelin.*
